Technology Activated, People Focused

DATA CENTER

Data Center Solutions

BACKUP & RECOVERY

Proper backups need to be: 1) Tested regularly, 2) Copied off-site, 3) Encrypted
Leverage the decades of backup and recovery experience that the LA Networks engineering team have, to make sure you never have to worry if you have all your data integrity needs covered.

UNIFIED COMPUTING

At the core of enterprise computing systems is a desire to perform and adapt faster and more efficiently. Whether you need a few rackmount servers, or a scalable fabric of stateless blade servers, LA Networks can design a Cisco Unified Computing System (UCS) solution tailored to your needs, and built to reduce total cost of ownership and increase scalability.

HYPER-CONVERGED SYSTEMS

Whether you are refreshing your data center infrastructure or are in need of a development environment, LA Networks can show you how a Hyper-Converged Systems can integrate your network servers, storage and virtualization functions into a single software governed module, to simplify your datacenter deployment and operations.

STORAGE

LA Networks works with major storage vendors, and has the experience to design, implement and assist you in the operation and maintenance of Fiber Channel, iSCSI, FCoE, NFS, CIFS, and all flash arrays.

VIRTUALIZATION

From server consolidation to Virtual Desktop Infrastructure, LA Networks has the experience to help your company improve resource allocation and eliminate redundancies, drastically improving efficiency, lowering capital expenditures, and reducing operational costs.

CLOUD SERVICES

Many of the services and applications that used to require large capital outlays to deploy and staff expertise to maintain are now available in off-premise hosted cloud environments. What does it take to connect your existing infrastructure and users to the cloud, and how do you ensure security and integrity of your data? LA Networks can orchestrate your migration to the cloud, or help you assess the weaknesses in your existing IaaS or SaaS deployments.

ABOUT

We help different organizations of all shapes and sizes understand, adapt, implement and evolve infrastructure technologies in the areas of collaboration, data center, mobility, networking and security.

Our differentiator is subtle, yet highly significant. We are an authentic, engineering-first organization and stay true to this identity. Technology excites and intrigues us and we never stop working to master the latest innovations from our key partner, Cisco.

Within greater Los Angeles, we are known as the go-to partner for Cisco who has the experience and ability to flawlessly execute the most complex enterprise-class solutions. We are a Cisco Gold partner, the pinnacle of Cisco partner certification.
